EDUCATION

Texas A&M University
Bachelor of Science in General Engineering

- Cumulative GPA: 4.00/4.00
- Relevant Coursework: Introduction to Program Design & Concepts, Discrete Structures for Computing, Engineering Lab I

College Station, TX
Aug 2025 — May 2029

PROJECTS

Full-Stack Developer, VitalCast AI

- Built a client-side health forecasting web app in React (Vite) that ingests 800MB+ Apple Health exports and predicts 10-year cardiovascular risk, sleep quality (PSQI), and HRV-based stress using validated clinical models (Framingham, PSQI).
- Engineered a custom regex-based parsing engine running in Web Workers to process large XML health exports in under 30ms without blocking the main thread.
- Designed a privacy-first architecture with 100% client-side execution (no server uploads) and implemented an interactive “what-if” simulator plus jsPDF-generated clinical session reports.

Project Lead / Full-Stack Developer, BookEasy Itinerary Planner

- Built a full-stack travel itinerary planner with a Next.js/TypeScript frontend and a FastAPI (Python) backend, exposing REST endpoints for itinerary generation, booking confirmation, and live disruption replanning.
- Designed a deterministic rule-based replanning engine that reshuffles activities based on flight-delay severity (under 60 minutes keep plan, longer delays shift the first-day schedule and demote lower-priority items).
- Led a 4-person team end-to-end under a 24-hour hackathon deadline, owning architecture decisions, API contract design, and CORS-enabled frontend-backend integration.

LEADERSHIP & INVOLVEMENT

Secretary
ColorStack at Texas A&M University

2026 — Present
College Station, TX

- Elected Secretary of TAMU ColorStack, a chapter of the national ColorStack organization supporting Black and Latinx students pursuing careers in computing.
- Manage records, meeting minutes, and internal communications for a growing executive board and general membership focused on technical career development.
- Contributed to the chapter’s new website using HTML, CSS, and Git/GitHub for version control and collaborative development alongside the executive board.
- Coordinate outreach and member engagement to expand the chapter’s presence within the Texas A&M College of Engineering.

WORK EXPERIENCE

Produce Clerk
H-E-B

2025 — Present
Frisco, TX

- Balance 20+ hours of weekly shifts with a full CS course load while maintaining a 4.00 GPA, demonstrating strong time management under pressure.
- Train new team members on inventory systems and department workflows, building clear technical communication skills.

Technology & Operations Intern
Frisco Public Library

2024 — 2024
Frisco, TX

- Troubleshoot hardware and software issues across patron and staff devices, diagnosing problems and walking users through solutions.
- Supported digital workflows and internal database operations, gaining early exposure to structured data systems and basic IT operations.
- Documented common technical issues and resolutions to streamline future support requests.

SKILLS

- Languages:** Java, Python, JavaScript, TypeScript, HTML/CSS, SQL
- Frameworks & Libraries:** React, Next.js, Node.js, FastAPI, Vite, Tailwind CSS
- Tools & Platforms:** Git, GitHub, VS Code, Vercel, Web Workers, REST APIs
- Concepts:** Object-oriented programming, data structures, client-side architecture, API design, deterministic algorithms
- Spoken Languages:** English (native), Spanish (intermediate)
